

Free Support Group For Parents of Children Diagnosed with Cancer

OU Physicians (405) 271-5067

Oklahoma City, OK -- A support group for parents of children diagnosed with cancer is scheduled for noon Wednesday, April 9, at The Jimmy Everest Center in the OU Children's Physicians Building, 940 N.E. 13th Street, MRI 3000.

The meeting provides discussion time for participants to share personal experiences or hear from others with similar challenges. Parents of children with cancer, survivors and family of patients are welcome to attend. For more information contact Danny Cavett at 405-271-5758.

With nearly 450 doctors, OU Physicians is the state's largest physician group. Our practice encompasses almost every adult and child specialty. Many OU Physicians have expertise in the management of complex conditions that is unavailable elsewhere in the state, region or sometimes even the nation. Some have pioneered surgical procedures or innovations in patient care that are world firsts.

About 150 of our doctors are OU Children's Physicians. The majority of them are board-certified in children's specialties, and many provide pediatric-specific services unavailable elsewhere in the state. Many children with birth defects, critical injuries or serious diseases who can't be helped elsewhere come to OU Children's Physicians. Oklahoma doctors and parents rely on OU Children's Physicians depth of experience, nationally renowned expertise and sensitivity to children's emotional needs.

Fourteen OU Children's Physicians hold Children's Medical Research Institute (CMRI) Endowed Chairs. Through endowed programs, CMRI helps fund the research and education efforts of

leading pediatric doctors at the OU Health Sciences Center.

OU Physicians see patients in their offices at the OU Health Sciences Center and in Edmond, Enid and other cities around Oklahoma. When hospitalization is necessary, they often admit patients to OU Medical Center. Many also care for their patients in other hospitals around the metro area. OU Physicians serve as faculty at the University of Oklahoma College of Medicine and train the region's future physicians.
